

Semi-Auto Finger Jointing System

**F-A05
Finger Assembler**

For jointing two short sticks end to end to produce a longer one, up to 4.5 meters or 6 meters in length. Two-step sequence of finger assembler from feeding. Multiple-step cut-off to pressing, outfeed is synchronized.

PT. Valtekindo Global Intertek

A new economical and easier way to finger jointing operations.

Finger jointing efficiency, quality and dependability-with an economy you will love. Because this finger jointing system is design and engineered with speed, performance, accuracy and cost in mind. The line is easier to operate than ever before. It integrates many fine features such as: Fast and effortless stock feed, linear motion guides on table slideways for superior straight accuracy, and optimum finger shaper cutting quality.
