

Semi-Auto Finger Jointing System

F-C57
Left SIDE FINGER SHAPER

It Combines two functions-trimming and shaping in one unit on the left end of the workpiece. Table traverse is driven by air/hydraulic combination cylinder, assuring maximum stability.

F-C58
Right SIDE FINGER SHAPER

It combines three functions-trimming, shaping and gluing on right end of the workpiece. Table traverse is drive by air/hydraulic combination cylinder, assuring maximum stability.

FJ-15 series Advenced Manual Finger Jointing System

F-C51 & F-C52
FINGER SHAPER F-C51 (Left) & F-C52 (Right)

- The finger shaper consists of a trim saw, a shaper, and a moving table which cuts the work pieces in batches.
- The batch system has proven to be the most effective system. It allows the use of short pieces as well as longer lengths. The system also allows the same machine to produce vertical and horizontal joints.

F-G01
Gluing Unit

- This gluing unit applies glue to the shaped workpieces before they move to the assembly press.
