

Horizontal Auto Finger Jointing Line

F-T67

CHAIN DRIVE PRE-PRESS ASSEMBLY STAND

- The pre-press assemble stand employs chain feed, and provides 3 and 6 meters of length to choose from.
- This assemble stand provides pre-pressed board ready to be cut to length, and ensures accurate vertical and horizontal alignment of finger joint. The pre-press is fully synchronized with cut-to-length process.

F-A63

ASSEMBLE PRESS (Double Sides Pressing)

- The assemble press employs two hydraulic cylinder at front and rear, providing more powerful and faster jointing performance. This special design also assure extremely consistent jointing effect on the entire wood.
- The assemble press joints short stock to produce long board length up to 6800 mm.
- A synchronized 2-step process allows the back of the press to continue jointing and cutting to length while the front of the press is performing pressing and outfeed motions.
- Times of cut are controlled by limit switches, which permits for maximum 4 times of cut setting.

Automatic Wood Arranging Conveyor Table (Optional)

The automatic wood arranging conveyor table provides an automatic infeed of wood, that dramatically increases productivity.

-It is constructed of a conveyor table combined with brushes for auxiliary infeed of wood.

F-I31

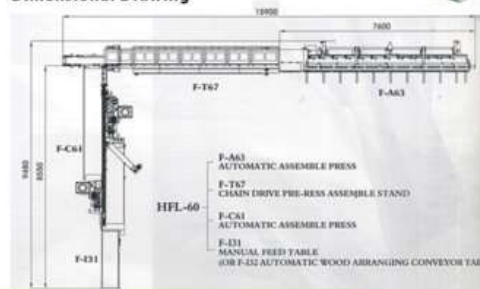

Manual Feed Table (Standard)

The manual feed table allows the operator to place wood on the feed table.

Powerful Suction Table

The suction table is designed to prevent wood from turning over before feeding into the pre-press assemble stand.
