

MAIN COMPONENTS OF PAPER MACHINE

Rubber Roll

Granite Roll

Dryer Can

Cylinder Mould

Rubber Roll and Marble Roll

Dryer Can

cast iron alloy dryer is a low-pressure vessel which is used to dry among paper machineries, its heating medium is vapor; The design pressure is 0.09 Mpa, its primary material is Ht220, and is composed of cylinder body and end closure, It integrates with 48 model M18 bolts, and finished by exact grinding.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

Rubber Roll and Marble Roll

Performance instruction: specializing in paper making machine, doing without rotation direction, having uniform crystal and tough texture, and never loosen. The indicators of anti-pressure and water absorption are superior to ministerial standard.

Cylinder Mould

Stainless steel cylinder mold in slip and wire winding adopts the advanced technology from overseas, which is a new product takes high-quality material and advanced technology, It fills up a blank in the field.
