

PRY-1060 Automatic Die-cutting and Creasing Machine

Introduction

PRY-1060 is special equipment applied to die-cutting of advanced colored paper boxes. The machine combines several advantages of many other die-cutters both at home and abroad. Gripper bars with high intensity are applicable to all kinds of cardboard, paperboard and corrugated paper. Frontal, back and side position mechanism ensure great precision of die-cutting. Other parts adopt intermittent mechanism with high precision, air clutch, pneumatic locking mechanism, programmable controller and man-machine interface. The interface can display various running information, such as working speed, amount of paper processed, total run time, etc. It is easy to eliminate errors according to the display of trouble shooting. Transducer is adopted to control the motor in achieving infinitive variable speed transmission. The machine has a lot of sensor and safety device to guarantee the operation and personal safety. Pressure is easy to be adjusted. It can also realize die cutting without clipper margin. All these advantages make the machine prominent in high quality and relatively a lower price among similar products.

Technical data

Model	PRY-1060
Max paper size	1060 × 760mm
Max Die-cutting size	1040 × 710mm
Min Paper Size	450 × 360mm
Max Working Pressure	250N/cm ²
Max Die-cutting Speed	7500(pc/hour)
Paper processed grammage	1. cardboard: 80-2000g/m ² 2. Corrugated Paper: <5mm
Power	18KW
Weight	14t
Dimension	4800 × 2100 × 2010mm
