1. Wood hammer crusher can crush all kinds of biomass waste into fine powder, such as wood chips, wood shavings, straw, stalk e.c.t also can crush animal feed materials, such as corn, weeds, soybean, maize, cereal.
2. There is one screener sieve installed at the industrial grinder bottom, the crushed power will outlet form bottom screener hole, generally if raw humidity smaller than 20%, we will install 2-4 mm sieve, then will outlet smaller than 4mm dimension powder. If raw humidity is very large, we will install 0-30 mm hole screener or even don't install screener.
3. Industrial grinder key spare parts hammers and screener are made by our CNC systems, through high technical heat treatment, standing out form other suppliers is that we could ensure its high precision and good quality.
