The multifunctional hammer mill's working principle is that when the material enters into crusher, grinded by the beat, fraction power from the high speed rotating hammers, then the required powder screened by the sieve. The YSG series hammer mill can crush the wood chips, rice husk, agricultural stalk/straw pieces, and shell or grain crops. Meanwhile, the hammer mills grind the PVC and rubber with water cooling system, so it called the multifunctional hammer grinding machine.

型号 (Model)	功率 (KW)	产量 (T/h)	锤片
YSG50	15	0.6-0.8	16
YSG65X27	22	0.8-1.5	24
YSG65X55	37-45	1-2	48
YSG65X75	55-75	2-3	72
YSG65X100	90-110	3-4	96
YSG130X55	110-132	5-6	80
YSG130X100	160	7-8	160

Stump Crusher

Features like a hydraulically adjustable front wall with built-in screen, in-line with innovative features like V-Rotor and Super-Cut for higher throughput and operator friendly operation. A unique modular design makes these shredders suitable for a wide variety of applications. More than 80 options, many of which can be retrofitted, are available, allowing the shredders to be adopted to individual customer needs.

Life of common options:

Cooling system for hydraulic and gearbox oil, Horizontal and vertical ram comb plate, Pipe spacer Retractable counter knives, Rotor cooling system, Hydraulically adjustable lift-up screen, Press down device, Hopper extension, Turbo hydraulic, Segmented machine floor, V-Rotor with Super-Cut.
