Mixer Series

Single shaft and double spiral mixer

Note :
Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

This type mixer needs to mix the raw material by batch, the user needs time to discharge the finished products Meanswhile, the single shaft mixer is much more economical on price than double shaft mixer.due to single shaft mixer are processed by batch we suggest adding a silo the mixer.

型号 (Model)	有效容积 (m^3)	产量 (kg/批)	混合时间 (分钟)	均匀度 (CV≤%)	功率 (kw)
YSHJ-100	0.2	100	3-6	≤5-7	3
YSHJ-250	0.5	250	3-6	≤5-7	5.5
YSHJ-500	1	500	3-6	≤5-7	7.5
YSHJ-1000	2	1000	3-6	≤5-7	18.5
YSHJ-2000	4	2000	3-6	≤5-7	22
YSHJ-3000	6	3000	3-6	≤5-7	30
YSHJ-5000	10	5000	3-6	≤5-7	37

Double Mixer

Introduction:Dual-Shaft Continuous Mixer is a special mixing device produced by our company ,which is used for mixing sawdust, stone powder material. It has the advantage of work continuosly,combine feeding and dishcharging organically.
Feature;1.New rotor structure ,no blind mix corner,mix material evenly.
Feature;2.Gap between the rotor and the machine casing can be adjusted,the bottom is a cotinous discharge port. the material residual is very little,the other side of the machine is gear transmission, prevent the phenomenon of material leakage, the decrease of the transmission power, greatly reduce the energy consumption
