LSSHJ Series Dual-Shaft Continuous Mixer

LSSHJ Series Dual-Shaft Continuous Mixer

LSSHJ series dual - shaft continuous mixer has new rotor structure, no mixed blind angle, mixing uniformity fine, distance between rotor and machine casing can be adjusted, bottom end is for continuous discharge, no material residual, the other end part of the machine is gear transmission, prevent material escape phenomenon; The decrease of the transmission power greatly reducing the energy consumption, the length of machine casing is longer, degree of homogeneity is high, mixing continuous accurate and reliable, equipped with liquid adding pipeline, combine feeding and discharging organically, reducing the equipment installation height, overall structure reasonable, beautiful appearance, convenient operation and maintenance

LSHJ Series Single-Shaft Continuous Mixer

LSHJ Series Single-Shaft Continuous Mixer

SSHJ series Single-shaft continuous mixer has new rotor structure, mixing uniformity fine, bottom end is for continuous discharge, no material residual, the other end part of machine is gear transmission, greatly reducing the energy consumption and can control moisture of the material efficiently.
