ML Series Creasing and Die-cutting Machine

Introduction

This kind of series machine combines functions of creasing and die-cutting. It is special equipment for creasing and cutting ordinary cardboard, corrugated board, plastic and leather, which is applicable to printing, packaging, decoration and plastic industries.

It is characterized by compact structure, fine workmanship, large pressure, high precision, easy operation, reliable performance, etc.

Features

1. Sliding bearing adopts high quality copper alloy, resisting and shock absorption.
2. High degree of force of the free-wheel, high pressure.
3. Use high level material integral casting for high intensity machine.
4. Single plate electromagnetic clutch is sensitive and reliable safety.
5. Single pressing, continuous pressing, adjustable delay pressing .
6. Operational height is reasonably arranged. The opening angle of moving bed is optimum.
7. Reliable performance of safety protection system.
8. It could be equipped with inside or outside flexible frame and centralized oil filler.
