Wood Chipper Series

Brief Introduction of Drum Wood Chipper :

The raw material is small diameter wood, timber harvesting (such as branches , twigs, etc) , processing residues (such as branches, twigs, planks, logs core, waste venner, etc.), it can also be used for cutting non-wood materials (such as sugar cane, reed, bamboo, etc.),

Main Structures of Drum Wood Chipper :

Drum Wood Chipper is composed of base, blade roller, upper and down (below) feeding system feeding equipment, hydraulic press crushing system and electric control system.

Features :

When Wood chipper runs, materials in the crushing system can be fully crushed, high efficiency, low consumption, discharging evenly. Moreover, it has the following features, such as low noise, no pollution, easy operation and simple maintenance.

Model	Power (KW)	Capacity (T/h)	Feeder Size (cm)	Panel Production Size (mm)
YBX216	55+3+1.5+3+1.5	5-8	23×50	30
YBX218	110+5.5+1.5+5.5+1.5	8-15	30×68	30
YBX2113	220+7.5×2+1.5+1.5	15-25	35×80	30

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
