

DIE CUTTING & CREASING MACHINE

No. 0303

ZX1060MPC Automatic die cutting and creasing machine with stripping station

DESCRIPTION

1060MPC Automatic die cutting and creasing machine equips with the stripping system, it can remove all the useless block or edges (except gripper edge), so the production efficiency is greatly improved and makes the operation reasonable.

Features:

1. It has function of stripping which can cut off all useless blocks or edges (except gripper edge), improving the production efficiency.
2. Stripping frame can be lifted automatically and is equipped with central registration device, easy operation and reducing time of preparing.
3. Presetting table is equipped with central registration device, which is convenient for installation of stripping plate.
4. Intermittent construction with high precision, which is made by professional manufacturer, ensure the stable running of machine.
5. Reasonable construction design solves the problems of low speed and sheet separation.

No. 0304

ZXY1500 semi-automatic die-cutting and creasing machine

Specification

Model	ZXY-1500
Max. paper size	1500x1100mm
Min. paper size	550x500mm
Max. die-cutting size	1490x1090mm
Max. die-cutting pressure	300N/cm ²
Paper processed	Cardboard
	Corrugated
	g/m ²
	8mm (max. thickness)
Max. die-cutting speed	4000 sheets/h
Max. feeding pile height	1400mm (above the level)
Max. delivery pile height	1200mm (above the level)
Total power	13.5kw
Total weight	16T
Dimensions	4200x2300x2250mm

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

No. 0305

ZXY1450 Automatic Die cutting and Creasing machine

Specification

Die. Cutting style	Even to flatten (bottom moving, top not)
Max. paper size	1500x1100mm
Min. paper size	700x680mm
Max. die-cutting size	1490x1090mm
Max. die cutting press	300T
Paper processed	Cardboard 1-8mm
Max. speed	4500 sheets/hour
Max. feeding pile height	1400mm (above the level)
Max. delivery pile height	1200mm
Total power	11kw
Total power	20kw
Weight	16T
Dimensions	7380x3890x2200mm

DESCRIPTION

ZXY1500 semi-automatic die-cutting creasing machine is a boxes made of paper. The machine combines several advantages over many other die-cutters both at home and abroad. Gripper bars with high intensity are applicable to all kinds of cardboard, paperboard and corrugated paper. Front, back and side registration mechanism ensure great precision of die-cutting. Other parts are adopted such as intermittent mechanism with high precision, air clutch, pneumatic locking mechanism, programmable controller and man-machine interface. The interface can display various digital information of machine such as working speed, amount of paper processed, total running time, etc. It is easy to eliminate troubles according to the display of trouble shooting. Transducer is adopted to control the main motor in achieving steep speed variation. The machine has a lot of sensors and safe-ensuring devices to guarantee the safety to operator and of environment. Frontal and back pressure can be adjusted separately. It is convenient to stop the machine by hand. It can also
