

Sawdust Machine

Product Name:

Yulong new patent products MXJ series sawdust Machine :

This machine adopts advanced technology from abroad, the heart part is " Alloy steel group gears " rotor, and the gear crown uses the high alloy anti-friction material. It has features of special design, reasonable structure, low consumption, high efficiency and long lifetime. Sawdust machine is our special patent product, making round log to sawdust directly, achieved the international advanced standard. This sawdust Machine is the most ideal equipment for biomass energy fuel plant and wood plant.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
