

PAPER CUTTING MACHINE

No. 0204

Digital Display Paper cutting Machine.

STRUCTURE FEATURES

This product through the CE authentication, the number reveals uses the microcomputer technology, the display monitor for the environmental protection liquid crystal display monitor, the electric system uses through the CE standard electric appliance part and the import electric appliance part, the hydraulic system uses the import.

No. 0205

Microcomputer double hydraulic double guide paper cutting machine

STRUCTURE FEATURES

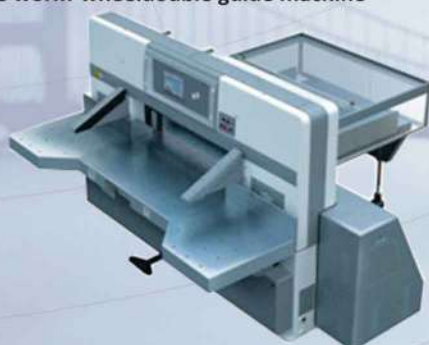

MICROCOMPUTER: It is equipped with imported whole set computer controlling system.

The computer has functions as following: the warning for the wrong input, self diagnose malfunctions and display the wrong coding. It has 50 programs, each of them can store 100 cuttings'data.

AZYK-5 Program Control Paper Cutting Machine

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

STRUCTURE FEATURES

This series of machine double worm-wheel double guide machine with slot less worktable, which have got patent. The paper-delivering structure is consists of high-speed ball screw, linear guide and slot less worktable. in order to ensure the position precision, the paper-pressing structure use the hydraulic drive. And the pressure can be adjusted in the pressure scope. For the cutting structure, the worm will drive the double worm-wheel to pull the knife bed, in the knife bed hand cutting device. For all the devices, the machine have the features of big cutting pressure, high
