

PRY-630/1000 I-type Automatic Case Maker

Introduction

This machine adopts automatic feeding system for paper, automatic positioning device for cardboard. There are features of accurate, quick positioning, and beautiful finished products. It is used to make perfect book covers, cover of notebook, moon cake box, mobil box, calendars, hanging calendars, files etc.

Features

1. The feeder in this machine adopts back-push feeding system, which is controlled pneumatically, and its structure is simple and reasonable.
2. Unique cam control feeder movements, air wire rope drive (patented technology)
3. The width between stacker and feeding table is adjusted concentrically in the centre. The operation is very easy without tolerance.
4. Paper feeding and positioning system adopt imported high-precise photoelectric ,with a correction function (patented technology), control device to make the paper and cardboard location more accurate.
5. In the cardboard feeding table, the machine can automatically stop when lack of paper to reduce the paper waste.
6. Big-power air sucker is adopted for conveying belt to feed the paper more stably and accurately.
7. Automatic four-edge folding automatic machine adopts special automatic angle-repair, edge-repair, unique front and rear flap fold Agency (patented technology) to ensure the qualification of finished products.
8. The whole machine adopts PLC control, featuring in simple operation. The troubles are displayed directly on the computer touch screen, which helps the operator easily remove them.

Technical data

Model	PRY-1000	PRY-630
Power	10KW 380V/50Hz and 220V/50Hz	
Paper Thickness	80-200g	
Paper Width	80-600mm	
Product size Max.	L1000×W500mm	L630×W300mm
Product size Min.	L95×W150mm	L95×W150mm
Cardboard Thickness	1-4mm	
Strip Width	20-80mm	
Production Speed	25pcs/min (Max.)	
Machine Dimension	9500x2000x1700mm	7500x2000x1700mm
Machine Weight	2000kg	1500kg
