

MAKING BOXES EQUIPMENT

No. 1101

Automatic Book Cover Machine

DESCRIPTION

The machine features automatic feeder paper feeding system, automatic paper pasting, automatic positioning, automatic paper folding, automatic forming and automatic tiding-up finished products. It is used to make perfect book covers, calendars, hanging calendars, files etc.

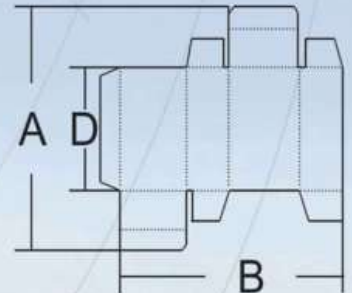

1. The feeder adopts back-push feeding system, which is controlled pneumatically and server motor.
2. The particular function of positining and correcting an error for cardboard can make it locating on the cover sheet accurately, and the positioning error brought by glue paper excursion is settled completely.
3. The air draft device of product line avoid powdery paper bend and air bubble and its tail is equipped automatic smoother device.
4. The delivery table is a lifting table of automatic control, smooth delivery.
5. Intelligent touch screen display and operate. It is more expediently, more directly for man-machine conversation.
6. It adopts Japan OMRON PLC intelligence software control system, automatic checking trouble, debugging is convenient and quick, decrease waste of raw and processed materials.

Specifications

Model	ZXFM-460	ZXFM-600
Length of paper	100-700mm	100-700mm
Width of paper	90-450mm	90-600mm
Paper thickness	100-200g	100-200g
Cardboard thickness	1-3mm	1-3mm
Speed	7-30 sheets/min	7-30 sheets/min
Power supply	4.5kw	4.5kw
Power consumption	6.5kw/380V	6.5kw/380V
Machine weight	2500kg	2700kg
Dimension	820x2100x1200mm	820x2250x1200mm

No. 1102

NH-880 Automatic Folder Glue

Straight-Line Folding Boxes

A Max	:650mm
A Min	:70mm
D Min	:20mm
B Max	:630mm
B Min	:80mm

Specifications

Used Materials	Speed	Glue	Required-power	Net weight
200-700g cardboard	Max. 200m/min	Emulsion type (Fluid)	2.5kw 220V	1500kg

No. 1102

NH-880 Automatic Folder Glue

DESCRIPTION

1. Two pairs of gluing tanks up and down are equipped to work with all kinds of boxes.
2. Optional mechanism in this machine can work with CD, EMS courier, file, four-corner, six-corner, box complicater boxes.
3. Advanced synchronous belts are used, teeth to teeth match, correct, smooth driving, The machine solves some defects for same machines made by other manufacturer such as: V-belt running, chain driving, fast abrasion, big noise, strong vibrating etc.
4. Imported inverter and on-the-line mechanical speed regulator is adopted to control the distance between two feeding paper boxes. Speed and distance between paper boxes can be adjusted at random according to different paper size, shape and quality.

Optional

1. Gluing device for CD bags.
2. Gluing device for EMS courier bags.
3. Gluing device for file bags.
4. Device for creased boxes (box in box).
5. Cold or hot glue spraying system.
6. Machanism for four-corner, six-corner boxes
