

Horizontal constant-weight compress bagging machine series

PRODUCTS

SPECIFICATION

The machine arrives as a complete unite mounted on removable castors for easy positioning and relocating.

There is tubing fixed to the underneath of the machine which enables simple-stacker truck lifting.

Material is weighed on an electrical weigh indictor which can be done while the machine is compacting the previous weighed accuracy.

The material is then fed through the feed door which is dower assisted to ensure the door opens and closes with ease and safety.

Safety switch on the door ensure that the machine cannot press the material with the top door open.
