Brief Introduction

Flat die feed pellet machine is specially designed for processing feed pellet such as chicken, duck, fish, pig, horse, cattle, sheep, deer and ostrich etc, widely used for home, small or medium farm. Feed pellet increases the feed use rate and reduces waste. YMKJ series pellet machine can be used for making livestock feed pellet, such as sheep, cattle, horse, deer etc. It also can be used for making soft wood pellet, it adopts reducer transmission, better than belt conveyor transmission. YSKJ series is on the basis of absorbing advances technologies domestically and abroad. It adopts mosaic rotating roller, during working process, the roller can adjusted as clients requirements. It is specially used for making poultry feed pellet for chicken, pig, duck, goose etc. Less investment, easy operation, fast return back.
