

Precision saw arbor assembly

- The saw arbor assembly is precision and ruggedly constructed to ensure precision cutting and no vibration
- Pressure roller and saw arbor assembly are conveniently raised and lowered by separate hand wheel

Double anti kickback fingers

Double anti-kickback fingers provide maximum operation safely

Centralized control panel

All of machine motion control are centralized on a control panel for operation convenience. An oil empty warning lamp is provided on the control panel

Chain block

- Block surface is corrugated machined and hardened to resist wear (HR-303s belong to new precision type)
- Block firmly grips the stock
- Feed chain is absolutely aligned with saw blade, permitting for positive feeding of stock.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
