

Pelletizer Series

Horizontal Ring Die Pellet Machine

Brief Introduction:

YHKJ series feed pellet machine is specially designed for making poultry feed pellet, widely used in feed mill, farm, fertilizer plant etc. It contains feeder, conditioner, press room, protection and lubrication system etc.

Features:

1. Widely used can process complete feed pellet with various requirements.
2. When process material, the temperature is moderate, can maintain the microelements, good tasty and absorption.
3. The feed pellet after processed is high density, smooth surface, easy to storage and transport, also can store long time.
4. The feed pellet diameter can be adjusted between diameter 2 mm and diameter 8 mm (change the die with different diameter), length can be adjusted between 5-20 mm, suitable for animal different growing period.

型号 Model	YHKJ250	YHKJ300	YHKJ320	YHKJ350	YHKJ450	YHKJ610

Briquette Machine

1. YHJ biomass briquetting machine is suitable for all kinds of forage and straw briquette feed, also suitable for biomass fuel, is an important device for green environmental protection industry.
2. Advanced feeding device and die technology, in the premise of forming rate of 100% under the material faster, increase of feed production makes the lower cost in the same employment situation. The design principle of special to reduce power consumption by more than 50% the yield increase.
3. Mould with high temperature preheating function, wide application range, low requirements for moisture content. Processing range: all kinds of agricultural and forestry biomass waste. Some industrial products processing waste. Such as: corn straw, cotton stalk, straw, peanut shell, rich husk, sawdust bark, leaves and twigs of furfural xylitol residue and animal manure, garbage, palm silk, palm shell etc..

型号 (Model)	功率 (KW)	加工能力 (T/h)	成型尺寸 (mm)
YHJ-1200型	110	2.5-3.5	32×32
YHJ-1600型	75	1.5-2.5	32×32
YHJ-1800型	55	1.2-1.5	32×32
