

SUPER MD 4 Side Planer / Moulder

Universal spindle (optional)

The last spindle is universal. It can be used as a top or bottom, or left or right side and also be set at any angle.

Note :
Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration
without notice!

Tool calibration device (optional)

A tool calibration device can be supplied to allow you to conveniently calibrate each cutting head, thus ensuring that each one runs perfectly.

Extra pneumatic pressure wheels for vertical spindle

Optional attachment for extra pneumatic pressure wheels in place of "short stock pressure roller" . especially for the MD-300 mm series model.

Anti-kickback fingers (optional)

the anti- kickback fingers provided at the indeed end ensure safety for the operator and especially good for multi blade rip sawing.

Auto hopper feed magazine (optional) ~ for feeding speed 36M/ per min.

This mechanism provides maximum convenience for feeding stock into the machine, keeping downtime to the minimum. And increasing the rate of production. Especially helpful when cutting short stock.

Groove guide table (optional)

This groove guide plate provides an accurate stock feeding path, which is especially helpful when working on short or warped stock. Ensure perfect straightness accuracy.
