STANDARD FEATURES :

1. Offering standard feeding speed up to 36 M/min. And optional high feeding speed up to 60M/80M/min.
2. Adjustment of each spindle can be easily performed and provided with mechanical digital readout.
3. The fully safety enclosure serves as a chip guard and helps reduce noise.
4. Each spindle is driven by an individual motor and fitted with a high speed belt for power transmission.
5. Table surface is hard-chrome plated for maximum wear resistance. High feeding speed model is more thickly hard-chrome plated.
6. All manually adjusted turning parts with dry bearings and oil-free lubrication.
7. Auto. Lubricator is provided to supply oil to the feeding table.
8. One-pieces cast iron machine frame is heat treated for maximum stability and rigidity.
9. High precision spindle construction and specially heat treated. High precision bearings provide maximum cutting stability and permanent accuracy.
10. Heavy-duty gear box system ensures no loss of power transmission.
11. Mechanical digital readout on the front and rear of the top spindle is standard.
