

FULL AUTO COPY SHAPING MACHINE

FEATURES:

- This machine breaks from traditional manual processing on a shaft center processing machine, and is especially mounted with a PC program controller to enable processing speed in accordance with a CNC computer copying machine, however, the lower price of this unit reduces the burden of large capital requirements, and lowers the cost of production
- Utilized double-shaft & double-cutter device to process according the strips of wood. It prevents cracks & fragmentation and can solve re-polish problems.
