

Full-Automatic V Fold Facial Tissue Machine ZD-CL2000

Features

1. Automatic counting and stacking device, with the advantages of fast speed, accurate quantity, etc..
2. Adopting screw turning knife to cut and vacuum absorption to fold.
3. Adopts folding pattern through vacuum absorption, which possesses auto stop when paper breaks, auto electronic counting and pneumatic staggering function, thus facilitate to separate the designated quantity of tissue for next step if packaging.
4. This equipment can have embossing unit and it is wide range of production width for selection

Technical Parameters:

Max width of jumbo roll	2000 mm (10 line)
Unfold width (mm)	Standard size (specify by customer)
Diameter of jumbo roll(mm)	Φ 1500(Maximum diameter)
Core inner dia. of jumbo roll	76.2mm(Other specification, please specify)
Production speed	80-110 m/min.
Power	3 phase, 380V/50HZ.
Controller	Frequency control
Cutting system	point cut by pneumatic type
Pneumatic system	3P Air compressor, min. pressure 5kg/c MPa(prepared bycustomer)
Ply	1-4ply(according to customer's requirements)
Paper break type	Biaxial spiral knife
Folding type	Continuous operation, suction folding
Belt of output tissue paper	Independent drive flat belt
Tension control	Independent transmission

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
