Outstanding features

- * Cuts dovetailed tenons mortises simultaneously for accurate jointing
- * Dovetailed width and depth are adjustable
- * Continuous tenoning motion
- * Automatic motion cycle provides efficient, economical operation
- * High spindle speed 20,000 R.P.M
- * Simple to operate, simple to maintain
- * 3 feed speeds change suitable for cutting various wood materials

RUGGED GUIDE ROD

Tenoning head feeds on an oversized guide rod, hard chrome plated, for maximum stability of tenoning operation and maximum wear resistance.

CUTS DOVETAILED TENON AND MORTISE SIMULTANEOUSLY

The workpiece to be jointed are placed together on the machine for cutting dovetailed tenons and mortises simultaneously. ensuring high accuracy jointing effort.

CENTRALIZED CONTROL PANEL

All of the machine motion controls are centralized on one control panel for operation convenience. Control functions include single start/stop, manual / automatic mode selection.
