

UPPER ROLL UNIVERSAL THREE ROLLERS ROLLING MACHINE

- Pre-bending function

- Cone bending function

1. Unique curve technology, the end part of high accuracy has in advance curved no back angle when bending continuously, curved course digital control;
2. Man-machine interaction control interface, efficient intelligent operation. Physical curve technology software, man-machine interaction window, curved course automatic compensation;
3. Rich curved shape, have rolling O type, U type multi stage R and other different shape

Model	Max. rolling thickness (mm)	Max. pre-rolling thickness (mm)	Plate width (mm)	Diameter of upper roller (mm)	Main motor power (kw)
