

# NH-1900

## NH-1900 CLOTH INSPECTION AND WINDING MACHINE

### Product Features

Mainly used in textile, garment, printing and dyeing industries, to inspect and wind all types of fabric.

1. Compact structure, reasonable, nice appearance, easy operation.
2. Equipped with imported speed regulation of frequency conversion, Step-less speed adjustment in 0 - 80m/min to meet your inspection and winding requirements.
3. High-precision automatic edge control device, the cloth-rolling more neatly.
4. Excellent performance of the take- up tension control system, ensure the elastic cloth roll can be adjusted.
5. Equipped with the automatic-control measuring device, can convert between meter and yard.
6. Equipped with return-device and automatic rolling device, teh detecting and rolling can be finished simultaneously.t

### Usage

Mainly used in textile, garment, Printing and dyeing industries, to inspect and wind all types of fabric

### Technical Parameters

|                                   |                                                  |
|-----------------------------------|--------------------------------------------------|
| Fabric Width                      | 2400mm                                           |
| Fabric Diameter                   | <580mm                                           |
| Inspecting Speed                  | 20~60m/min                                       |
| Edge Correction Type              | Mechanical                                       |
| Edge Correction                   | ± 3mm                                            |
| Measurement Error                 | = 0.4%                                           |
| Balanced Tension Adjustable Range | 0-400N                                           |
| Main Motor Power                  | 1.5-3.7                                          |
| Weight                            | 1000kg (weight increase due to the fabric width) |
| Dimensions                        | 2800 (L) × 2000 (W) × 2000 (H) mm                |
