Product Features

QLW-851 is a new model professionally innovated from model 813. After innovation, the machine is highly enhanced in terms of let-off, shedding type, take up, power transmission and body stability, and therefore it gains more stable performance at high RPM. The model now has a wide application range, especially for weaving fine and medium density fabric. It is able to work with single pump and double nozzle electric feeder system, in terms of shedding type, cam and dobby shedding are available
