Products Details:

Place of Origin Shanghai, China (mainland)

Brand Name : Enntech

This machine is mainly used for the finished products, to detect the scissors in the box, packing racks, blades, pen and other items left in the packaging process.

1. Wide detecting channel 700mm (W) x 380mm (H), usually used for packed finish-product;
2. High-power transmission, conveying maximum load Weight is 50kg
3. The amount of qualified products, unqualified products and the total amount of products can be calculated;
4. Automatically adjust the belt deviation device, the belt will not be wandering;
5. Has the alarm system when the belt leaves the normal track, to ensure the life length of the belt as long as it can be;
6. Equipped with auto-starting device;
7. With the design of environment protection concept, auto electricity saving;
8. With environment monitor and location indicator for broken needles;
9. Auto alarming and auto-return function;
10. Anti-interference and high stability, high reliability and high sensitivity.

Detecting Mode	Electro-magnetic induction
Detecting Ability	Fe Φ 3.5mm
Detecting Adjustment	Step-less adjustment
Detecting Width	700mm (Standard Type)
Detecting Height	380mm
Alarm Mode	Beep
Belt Speed	(approx.) 30m/min
Power Supply	Single-phase 220V, 50HZ
Rated Output	(approx.) 260W
Dimension	1700(L) x 1150(W)x 1250(H)mm
Weight	(approx.) 280kg
