

Mesin Pembuat Benang Nanofiber

Nanofiber Spinning Mass Production

Applications and Examples of Nanofiber

Oil Absorption Performance (Water Control Fiber)

Nanofiber oil adsorbent has excellent oil absorption performance of about 50 times its own weight. It is a new material that can be used for environmental conservation such as oil spill accidents in oceans and river and factory effluent.

Hansui Performance (Hydrophilic Fiber)

Raising seedlings, greening materials, etc.

Hydrophilic nanofibers made from biodegradable raw materials are materials that can absorb and retain large amounts of water. There are great expectations as a new material for the most professional and environmental use.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice !
