FUNCTION AND CHARACTERISTICS

Fold curtain welding machine uses the most advanced thermal welding technology of the world that the temperature can be set free and the speed of welding is fast. The device adopts the technologies of micro-computer chip text screen controlling to make itself working more stable, the operating of itself more convenient. Mean while the device has the function of fold welding. The fold length can be adjusted free. The width of the fold and welding part of curtain can be 3000mm which solves the problem of welding for many times. The machine can adjust the strength of welding in accordance with the fabric to ensure the welding line even, reliable, high strength and good anti-tearing. The machine also has good welding quality and high welding efficient. This product has applied for patents, please do not copy!

Technical Parameters :

Max Fabric width	2.5/3.0/4.0m
Weld mark width	8.0/12.0mm
Power	220/110 VAC 50/60Hz
Rated Power	4.3Kw
Work pressure	0.3-0.6Mpa
Dimension (L*W*H)	3900x720x1650mm (3.0m)
Weight	930Kg (3.0m)
