FUNCTION AND CHARACTERISTICS

This product is mainly used in aluminum curtain rails to finalize the locks. The machine uses the MCU as control core. Operator input in the screen with corresponding arc length, this equipment is long string of aluminum alloy can be to finalize the bending. the curtain rails finalize the smooth, accurate arc. Using the human cost and greatly reduce the cost of materials.

TECHNICAL PARAMETER

Max bending radius	No limited
Min bending radius	R300mm
Angle range	90-180°
Power	380/220VAC 50/60Hz
Ratetd Power	4.5kw
Dimension (LxWxH)	1300x700x1300mm
Weight	460KG
