

ULTRASONIC CURTAIN CUTTING MACHINE

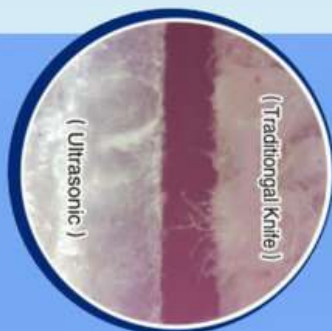

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!

MANUAL ULTRASONIC CUTTING MACHINE

- The traditional technology of curtain making is hand blade cutting, which is not only inefficient. and the edge trimming effect is poor. After being used for a period of time, the edge trimming will be falling off or fading.
- Aiming to solve the problems with the traditional technology of curtain making, the company has developed the Ultrasonic Curtain Cutler. This machine will not only help customers to solve the problems that the edge trimming will be falling off or fading. but also make a perfect edge trimming effect, that improving the grade of the product.
- The machine adopts the technologies of micro—computer chip, text screen controlling and precise line track moving to make itself working more stable, the operation of it self more convenient. and it has the automatic feeding function further more. The machine which adopts the German ultrasonic system has the characteristics of softly edge trimming cutting and no color fading.
- The company can also design and produce different types of ultrasonic curtain cutters based on the customers requires.
- This product has applied for patents. please do not copy!

30-50Times of Cutting Effect Picture

Technical Parameters:

Max cutting width	2.5/3.2/4.2m
Power	220/110 VAC 50/60Hz
Rated power	2.0 KW
Work pressure	0.3 ~ 0.5 Mpa
Dimension(L*W*H)	3930X940X1100mm(3.2m)
Weight	950KG(3.2m)
