

LABEL MAKING MACHINE

Note :
Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration
without notice!

Advantages & Function:

1. The machine uses a version of the computer system, painted flowers, easy, weft density by the electric control input parameters and can automatically take-up, eliminating the cumbersome mechanical handling gear action, worry and effort, non-destructive mechanical disassembly.
2. Meister MJ-5-type control box is like a real computer with the weaving needs of its multi-tasking function and a variable degree, to fully meet all the needs of textile industry.
3. Pan head frame and body piece, the precise combination of design and solid (the warp tape head is the main scientific and technological quality precision instrument control warp tension, with excellent stability, so that the fabric weaving balance, tension consistent.)
4. To fine-tune the edges, respectively, pan head yarn tension, yarn transfer control side even to achieve the revenue side of the fabric formation.
5. Jacquard heald held by spring hanging, can reduce the Jacquard heald mutual friction, lower wear rate jacquard power mesh panel.
6. Fabric to complete, after he gets with the take-up function in formation to receive finished neatly.
7. The jacquard machine completely sealed to prevent dust from entering the inside out, so the lubricant applied only once a year. Have safety devices to protect the user to operate smoothly. Jacquard interior does not require any maintenance.

Description :

The needle loom with big jacquard head+yarn creel end+2 pcs big beam+4 pcs small beam

PARAMETER	SPECIFICATION
Width	45 mm
Belt Numbers	8 pcs
Hooks	480 per belt
Weft Colour	7
Reed Width	46 mm
Max. Speed	950 rpm
Motor Power	3 kW – 380V
Size of Warp Beam	700 x 930 mm
Jacquard head	staubi
Overall Dimension	2250*2000*2850 mm
