

Fiberglass Warping Machine and High-speed Warping Machine

Fiberglass Warping Machine

TD968-3 Fiberglass Warping Machine is made on the research of the fiberglass material's characteristic and arts and crafts, this machine assure the tension identical between the beams with the help of automatic tension-control system, it performances very well, it's your best choice for improving fiber quality work efficiency and produce kinds of high-quality fiberglass.

High-speed Warping Machine

Characteristic:

TD968-8 High-speed Warping Machine adopts the latest technique and run more stable and more convenient. The machine combines the transducer, auto rebeaming, beam regaiting, tension Which is controlled by the air brake.

TD968-8 High-speed Warping Machine high speed warping machine is suitable for chemical fabric filament, low stretch yarn, complex yarn, high twist yarn, color weaving and decorate weaving It can be used with rapier or shuttlelessloom for preparing weave.

Note :

Due to keeping innovation, the specification and Machine pictures or color are subject to alteration without notice!
