Purpose:

- ☆ Specializing in winding various rubber lines and palm fibres and etc.

Machine features:

- ☆ The-state-of-arts variable frequency adjustable speed control allows the machine running more stable. The speed can be adjusted and the operation is simple.
- ☆ The rear rack device is positive rubber feeding. The tension of rubber lines can be adjusted to ensure the tension of rubber lines keeps unchanged from starting to end. Synchronous motor control and fine adjustment system are specially designed, which control the tension efficiently and achieve ideal effects.
- ☆ Line breakage automatic stopping and the stopping device by setting length can avoid the waste of rubber lines.

Special devices:

- ☆ The rubber wheel size and the position quantity of creel can be customized.

Model	No. of sizing (piece)	Voltage (V)	Power (H.P)	Speed (T/M)	Pressure (P)	Middle Distance (m)
SJB60	60	220	2	0-300	5	3
SJB90	90	220	2	0-300	5	3
