

CNC Hinge Hole Machine Center ABD260/260F

FEATURES

- ABD260 is suitable for door triple piece drilling and horizontal drilling.
- ABD260F is suitable for door's investable hardware handle milling of vertical and horizontal side
- This machine is mainly used for processing side holes, horizontal drilling box equipped with 3 independent milling axes, shaft distance is 32 mm.
- This machine could realize the single-work station, double stations and four- stations processing operations, high production efficiency.
- minimum panel width is 20mm.
- glue mortising device is optimal.

Model	ABD260
Panel Length	20-2450
Max.Panel Length (2 stations)	1200
Max.Panel Length (4 stations)	600
Panel Width	100-2450
Panel Thickness	12-80
Y axis Adjust Range	0-50
Z axis Adjust Range	-5-75(CNC)
X Axis Speed	0-80m/min
Z Axis Speed	0-20m/min
Side Drilling Unit	3 drilling (drilling type)
Distance Between Spindles	32mm
Wheelbase	Customized Size
