

MSK2513E300E200

FEATURES

- This machine is mainly designed for panel nesting process, with sufficient strength and rigidity. It can also be used for engraving, boring and milling, ect.
- Easy operation, worker could work after simple training, get of dependence on skilled workers.
- After connect dismantling software, machine could do automatic labeling, automatic feeding, automatic optimization of typesetting and processing, vertical boring, automatic out feeding, to maximize panel utilization.
- The machine is equipped with automatic pusher, automatic table dust extraction device, automatic lubrication and automatic tool length sensor, easy operation, high production efficiency.
