

GL-200E Ink jet printer

- > GM-2000E ink jet printer can be applied to modern high-speed production line.
- > GM-2000E use japanese crystal-magnetism real multicolor LCD.
- > GM-2000E can prestore 500 items of printing information,can meet different sizes of printing data.
- > GM-2000E adopt inner placed pump,which is a kind of international famous magnetic force pump.Automatic cleaning system for nozzle jam when electricity is cut off,and this can save cost electricity is cut off,and this can save cost of ink and softener,to make sure the machine can work stable for long time.

- 1.kinds of spray letter: number,English,Chinese, simple picture,logo etc.
- 2.spray function: sequenceNo,Batch NO,Account numbèr for the production date editing,printing time can be synchronous with the machine:
Data delay to print,Data stored and repeat for printing:
Reverse and inverse letters can be printed;
Letters can be changed in to 1-9b old than normal;
Height and width of letter can be adjusted.

- 3.The ink pressure of nozzle is stable,pressure can be reset on the panel and can be inspected and adjusted automaticly.
- 4.Advanced ink viscosity inspection system and accurate software control can make sure the stable thickness of ink supplying
- 5.It adopts particular phase inspection and software.This can ensure the high quality of printing under anyu cirumstance.

Note :

Due to keeping innovation,
the specification and
Machine pictures or color
