

PRINTING MACHINE

No. 0136

SW-A Auto Stop Cylinder Screen Printing Machine Series

STRUCTURE FEATURES

Characteristics

SW-A Series full automatic stop cylinder screen press which adopts the classical stop cylinder technology with the advantages such as paper located exactly and steadily, high precision, high speed, low noise, high degree auto and so on, it is suitable for printing on ceramic and glass applique, electron industry (film switch, flexible circuitry, meter panel, mobile telephone), advertisement, packing and printing, brand, textile transfer, special techniques etc.

Characteristic

1. Classical stop cylinder mechanism. Cylinder stops step automatically to ensure the forehead of the printing stock can be sent accurately to the girder of cylinder, which is up to extreme high precision: at the same time, gripper of cylinder and pull side-lay both have the magic eyes for supervising if the printing stock is in correct place, which can reduce the waste effectively.
2. The bottom of convey table with vacuum adsorption, with the pull and press mechanism, ensure printing stock delivery smoothly.
3. Two cams separately control the movement of squeegee and ink-return blade: squeegee with the pneumatic pressure kept device, the printing graphis is more clearly and the ink layer is more well-proportioned.
4. The screen frame rack can be pulled out, which is easy for adjusting the register or feeding, as well as cleaning the cylinder and screen frame: at the same time, it is assembled with device to hold the ink dropped to avoid the ink drops on the cylinder.
5. Main transmission and main part lubricate automatically, prolong the using precisising and machine life in effect.
6. the whole machine controlled by PLC, can choose touch screen for operating, which is very easy and high degree automatism.
7. it can be used with JB Seies screen drying machine, UV dryer, UV & IR dryer and automatic stacker to form the full automatic scree printing line.

Specifications

Model	Max. paper size	Min. paper size	Max. printing size	Paper thickness	Printing speed	Power	Weight	Overall size
SW-720A/C	720x520mm ²	350x270mm ²	720x500mm ²	108-400g/m ²	1000-3600pcs/h	7.8Kw	3500kg	4200x2400x1600mm
SW-800A/C	800x600mm ²	350x270mm ²	800x590mm ²	108-400g/m ²	1000-3300pcs/h	8Kw	3800kg	4300x2550x1600mm

No. 0137

SW-C Full-Auto Cylinder Screen Printing Machine

STRUCTURE FEATURES

It is a kind of auto flat screen press of high speed and high precision. it's skilled manufacture, reason able structure, stable and high speed print paper feeding is equipped. It is suitable for soft and half-soft materials of Frequency control of motor speed is monitored and controlled automatically. PLC program table controller controls the whole machine. Centralized control is adopted in this machine with easy operation and high sensitivity. It reaches an advanced level in the country. Only one person is needed to operate the press. This machine can be used in kinds of print, especially colors of golden and credit card, and so on. The full oil, fresh color and stereoscopic model make the press better than others. Otherwise, customers can equip the machine with dryer. UV photo fixation machine, paper collection machine into an auto screen press line.

1. Automatic control automatic delivery, automatic paper jogging, simple and convenient adjustment.
2. Performed by pneumatic elements. paper breaking and other damaging are effectively avoided.
3. Up and down limit safety equipment for paper stacker is installed to avoid damaging the machine because of break down limit equipment
