

## AUTOMATIC CYLINDER SCREEN PRINTING MACHINE

Auto feeding

Auto printing

IR curing

UV curing (optional)

**Note :**  
Due to keeping innovation,  
the specification and  
Machine pictures or color  
are subject to alteration  
without notice!

### Instructions

- Advanced computerized system control, running smoothly.
- Can cylinder object.
- With the vacuum table (optional), the workpiece position is more precise.
- Output: 4000pcs/hr.
- Dust&flame treatment system and PP wiping treatment system are optional before printing.
- Automatic feeding and unloading system, running smoothly with less noisy, the printing distance & speed are adjustable.
- Adopt IR or UV curing (optional) system, it can finish the printing and curing at the same time; it is used for the printing of round type plastic or metal pens, small round tubes, medical syringes, chopstick, cosmetics lipstick tube, and so on.
- We provide machine design and construction services for special application.

### Parameter

| LC-YG                        |                          |
|------------------------------|--------------------------|
| Max. printing length         | 56mm                     |
| Object application dimension | 4mm<D <18mm              |
|                              | 7mm<L <200mm             |
| Power supply                 | AC220V 2Phase 50Hz 4.1Kw |
| Air supply                   | 6Bar                     |
| Max. running speed           | 4000Pcs/Hr               |
| Machine dimension            | LxWxH : 3100x1540x1200mm |
| Machine weight               | 530kg                    |
