

Hydraulic Fleshing Machine

Suitable for big size cow, steer, bull, buffalo and other hides etc.

The fleshing machine model 096_2700 or 3200 mm(working width) has been designed to satisfy every requirements connected to fleshing of cowhides. The machine has a monolithic frame with stainless steel crankcases and sheets, in order to withstand the corrosion.

The machine is operated by a hydraulic gear-case which controls opening and closing o rollers, leather feeding and knives sharpening. Speed of leather feeding(from 26 to 65 mt/min., or more if required) and speed of grinding truck for knives sharpening can be adjusted in order to get a very good fleshing with high production. The rubber roller quickly approaches to the blade roller, with a very smooth touch and adjustable pressure. The feed roller and the rubber are controlled by hydraulic motor with no chains, gear-boxes are greased and contained in waterproof boxes; the adjustable rubber bolster and blade roller is adjusted by a hand-wheel placed on the right side of machine.

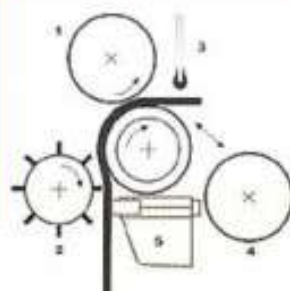

The 096 fleshing machine is equipped with a safety device in accordance with actual laws. If required, the machine can be equipped with automatic lubrication device and automatic opening system. Automatic lubrication helps in saving parts from wear and reduces maintenance of machine. The 096 fleshing machine is suitable to process every kind of cowhides with high production and few maintenance operations.

In order to improve continuously the quality of our production we reserve the right to change, without notice, the characteristics of the machine. Power and production data are indicative, on average basis, and naturally have to be adapted to working conditions.

Specification			
Working Width (mm)	1800	2700	3000
Main Engine (kW)	15	22.5	30
Pump Engine (kW)	2.25	11.25	11.25
Grinding Motor (kW)	0.75	0.75	0.75
Total Power (kW)	18	35	42
Net Weight (KGS)	4000	8300	8800
