

CIL-SP-A

■ Full-automatic high-speed type kitchen towel rewinder

Description:

QIL-5P-A Full-automatic high-speed rewinding and perforated toilet paper and tissue paper machine

This equipment is to perforate and cut the raw paper into various sizes according to the requested. The finished product is neat, in good order and with equality tens-on. It has the feature of compact structure, easy and stable operation, less electricity consumption and covers a small area of 8.4 m². The highest production speed is 150-200m/min. This model is the ideal equipment for paper making factory and paper processing factory. This equipment can process raw paper of 1.2m² 0.75m 1.95m 2.15m 2.35m 2.55m 2.75m in width.

This machine is consist of stand of raw material, paper conveying unit, embossing unit, spraying unit, perforating unit, reeling unit, electricity control and cutting system.

The production process is : unreeeling → embossing → gluing → perforating → reeling → cutting.

Main Function Features:

1. PLC (computer) control production, degree of full-automatic of production process is high, the function of machine is complete, production efficiency is high.
2. Load and change the core, spray glue, seal can be done without stop the machine. When changing the core, the machine will slow the speed and up the speed automatically.
3. When change the core to rewind, it will be tight first and then loose, to avoid the core loose.
4. Equipped with automatic alarm to indicate filling up of core pipe. The machine will be automatically stopped when there is no core pipes.
5. When raw material broken, the machine will stop automatically.
6. Each raw material used separately, equip with sensor control.
7. Easy to adjust to suitable different paper core.
8. There is tail after the finished product sealed with glue, easy to use.
9. There is pneumatic jack to load the raw material on machine.
10. Adopt two sets embossing roller to produce "dot-to-dot" embossment on the paper.
11. As required, the machine can equip with single color or double colors printing device, the pattern is vivid.
