

JS 203 GLOVE KNITTING MACHINE

Features :

1. **Sinker Knit System:** with this system, it offers products that are superior in stretch and strength as well as featuring excellent conformity to the shape of hands, which is vital for performing precision work.
2. **Centralized Lubrication:** it enables automatic lubrication to all required parts, improving the durability and productivity and facilitating maintenance. Oil is automatically supplied to all necessary components by the simple touch of a lever once a day.
3. **Durable Needle Bed:** it is formed by inserting special high-precision plates. Manufactured from special steel using state-of-the-art hardening technology, these plates provide extreme strength and durability for high-speed, high quality product manufacturing.
4. **High-Precision Carriage:** The carriage and cam systems are made of carefully selected steel and manufactured using a special computer-controlled hardening process, which increases its durability and anti-resistance.

Note :
