FEATURES

#1. Stitch Density Control =

A new stepping motor finely adjusts the glove to conform to the various parts of the hands. By doing so, gloves can be shaped to fit fingers and hands snugly and extend the benefits of ultra fine gauge gloves even further.

#2. Yarn Tail Insertion =

Previously, yarn tails sticking out of the fingertips were inserted by an air blower. JS204 features a new motor-driven yarn tail insertion, inserting the yarn tails into the fingertips for the highest quality.

#3. Compact Carriage =

JS204 features a completely new carriage system which is 20% smaller and 30% lighter than its predecessor. This design yields quicker and more responsive carriage and increases productivity, all while minimizing structural stress on the machine for increased durability.

#4. Computer Controlled Lubrication =

JS204 computer-controlled automatic lubrication provides an optimum amount of oil to all required parts according to a preset schedule. Automatic lubrication also prevents over-lubrication, conserving oil and keeping your products clean.

#5. Control Panel = it features on ease of operation. Large LED displays current knitting conditions. Touch-control numerical keys also offer convenient data input
