

## SL-206 SECTIONAL WARPING MACHINE

**Note :**

Due to keeping innovation,  
the specification and  
Machine pictures or color  
are subject to alteration  
without notice!

### Application :

It can be used in the warp arrangement of silk, ramie, cotton, fur and various kinds of chemical fiber filament.

It matches with various kinds of new-type shuttleless looms.

### Property :

- A. Entire diameter and back shaft stepless speed regulation
- B. Automatic length record (according to drum running number). Automatic, control length
- C. Electrical upper and lower shafts
- D. Interchangeable gear guiding bar speed regulation
- E. Adjustable belaying cleat

### Specification:

- A. Width: 2000 ~ 3600mm (which can also be designed according to the special requirement of the customer)
- B. Applicable beam diameter  $\leq \phi 800\text{mm}$
- C. Max. Diameter rotating speed: 12~120/min
- D. Max. back shaft rotating speed: 4.5~45/min
