

CNC Leather Punching Machine

YT – A2

Note :

Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration
without notice!

This machine is used to punch designs for bags, suitcases, footwear, belts, leather cases of mobile phone etc

TECHICAL PARAMETERS

Voltage	Frequency	Working Size	Punching Speed	N.W	Machine Dimensions
220V	50Hz	500x600(mm)	600 times/minute	500kg	2000x1400x1540(mm)

FEATURES

- 1.It is highly efficient in punching with punching speed up to 600 per minutes.
- 2.The punched hole is 0.8-12mm in size and there are 12 optional punch jigs.
- 3.The machine has specific window to adjust computer angle which can simplify the process of angle adjustment.
- 4.The machine has specific window to adjust computer angle and height adjusting mechanism which can simplify the process of angle adjustment.
- 5.The machine has specific punch jig mechanism to ensure punch is clamped solidly and durable in use
- 6.The machine is provided with independent dust collecting system to ensure the work platform is clean and tidy.
- 7.It adopts NC system and is provided of smart cutter setting function by which it can optimize the way of leather punching and increase punching speed, auxiliary leather positioning and laying function by which it can continue the holes not punched last time and not cause leather waste. The interface is clear, concise and easy to use.
