I. Overview

Plumbing electrical training device, can realize the building property basic skill training, training, is mainly including water, electricity, gas, warm, and other heating equipment installation and training. Actually training environment and engineering practical environment, the training equipment also are from engineering material

System structure using intelligent training unit, property training equipment are installed in training on the unit, students can be in unit repeatedly in disassembling equipment, students can practice on trainer for many times, and improve students' hand on ability.

II. Design descriptions

1. Training environment is stainless patch board, simulation users and installation carrier.
