

ZA3130

I. OVERVIEW

Transmission vehicle model	: Volkswagen Transmission
Model	: 01M
Working voltage	: 220V/380V equipped with leakage protector
Frequency	: 50/60HZ,
Power	: 220V-350W/380V-3000W
Inverter	
Power	: 4KW/5.5KW
Input	: AC 3PH 380V±15%
Output	: 9A/13A AC3PH 0~380V 0~400Hz
Dimension	: 1400×1000×1750 (L×W×H)

Note :
Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration

The whole rack uses international standard square tube, angle iron is with seamless welding, surface is under high temperature spray treatment after polishing, it is anticorrosive and anti-aging, does not fade, etc., the bottom of the rack is equipped with universal self-locking casters, convenient for the rack movement teaching. Control panel with pure aluminum plate (4mm thickness), control panel is painted with color and intuitive Volkswagen 01M automatic transmission schematic which is consistent with the original vehicle control system, and with manual and experiment guide books. Volkswagen 01M automatic transmission assembly, automatic transmission control unit, shift lever assembly, transmission oil cooling device, the combination meter, three-phase adjustable-speed motor, inverter, throttle body assembly, engine crankshaft sensor and signal plate, diagnostic seat, pressure gauge, fault setting system, the original car circuit diagram board and testing terminals, mobile rack and so on. It is equipped with task-drive teaching model training instruction and bench operating instruction book. Each sensor and actuator is installed with digital display meters, the rack is installed with oil duct pressure gauge, universal locking casters and stainless steel hand guard, protective devices are installed on the rack where is with high temperature and on the rotating parts.
