

Automobile Training System

DLQC-C-4 Stepless Automatic Transmission Training System

Note :

Due to keeping innovation,
the specification and
Machine pictures or color
are subject to alteration
without notice!

• Feature

- Speed motor-driven torque converter, driven by the normal gear shift of the automatic transmission, automatic transmission output shaft are configured with the brake disc and can brake the output shaft.
- Test panel to draw the models automatic transmission electronic control system schematics, panel Figure corresponding AT / ECU terminal with sensors, actuators to set test hole to test the voltage signal. Equipped with display lights which show work condition of gear shift and locking.
- Test panel drawing drive roadmap, basic oil line diagram and configure the oil line pressure gauge, configuration, data transmission diagnostic interface at the same time.
- Fault setting: can set fault by manuel or computer. easy to lest.

• Technical Parameter

- Power supply : three-phase, 380V, 50Hz/60 Hz, 3KW, 6.8A
- Total dimension: 1020mmx620mmx 1800mm
